Reason for Allowance

1. Regarding claims 1-28, the prior art fails to teach or suggest a code division multiple access (CDMA) comprising a sequence extender for extending each of the blocks using a predetermined number of chips to thereby form and extended spread signal, the sequence extender having an extender input coupled to the spreader output, in combination with other limitations, as specified in the independent claims 1, and 15.

Regarding claims 29-45, the prior art fails to teach or suggest a code division multiple access (CDMA) comprising an equalizer block, coupled to the transform block and having a channels estimator, for equalizing the transformed signal to thereby reduce channel distortion and form an equalized signal; an inverse orthogonal transform block, coupled to the equalizer block, for inverse transforming the equalized signal to form an output in the first domain; and a despreader for despreading the output to thereby derive a group of symbols, in combination with other limitations, as specified in the independent claims 29, and 45.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
